## Work Experience

JAF Digital Group Inc, Makati City

Jan 2025 - Feb 2026

---

**Timora HR and Payroll System** - Full-stack Developer

- Shipped features and resolved bugs for a SaaS HRIS and Payroll platform, serving 30+ SME clients and over 2000 employees, improving user satisfaction and system reliability.
- Automated CI/CD pipelines for Timora portal deployments, reducing release time by about 83%, from 30 minutes to under 5 minutes, enhancing operational efficiency.
- Implemented SAML 2.0 SSO with Azure Entra ID, enabling secure centralized user access to Timora Portal and improving team productivity.
- Integrated Hit Pay payment gateway for secure online payment processing within the Timora subscription billing system.
- Developed ZKTeco biometric API integration for employee clock-in tracking, enabling real-time attendance and improving accuracy for clients.

**Franchise Management System** - Full-stack Developer

- Built the front end of a franchise inventory and ordering system as a Progressive Web App (PWA) using Vite + React-TS, enhancing user interactivity.
- Developed a REST API backend with Node.js, Express, TypeScript, and Prisma ORM, deployed on Dokploy, improving system reliability.
- Integrated AWS S3 for secure document storage and Pay Mongo for robust payment processing, ensuring transactional integrity and system reliability.

Web Developer | OJT Trainee

Testronix Inc, Makati City

Feb 2024 - Apr 2024

---

**Finance and Accounting System** - Full-stack Developer

- Developed a desktop application for an Accounting and Finance Management System using Electron and React, enhancing financial tracking accuracy.
- Collaborated effectively using Git for version control, conducting code reviews, and providing project updates to ensure timely completion.

## Project

**GAD Management System** | <https://qadims.cloud/>

Full-stack Developer

Oct 2025 - Dec 2025

- 
- Developed a web application for Gender and Development program planning, budgeting, and reporting using Vite + React-TS and Tailwind CSS, streamlining the planning process.
  - Integrated OpenAI API for AI-assisted plan generation, reducing manual drafting time by about 50% per planning cycle and improving user productivity.
  - Built a REST API backend with Express, TypeScript, Prisma ORM, and Neon PostgreSQL, improving data management and retrieval speed.

**Cityvet Management System** | <https://github.com/asiloprince/cityvet.git>

Full-stack Developer

Aug 2024 - Nov 2024

- 
- Utilized Vite + React-TS and Tailwind to build responsive web apps, improving user experience across multiple devices.
  - Built a backend with Node.js and Express, facilitating efficient handling of beneficiary records and livestock data.
  - Designed relational database schemas using MySQL and SQLite, enhancing data organization and retrieval capabilities.

**ChizzQuiz** | <https://github.com/asiloprince/Django-Quiz-Web-Application.git>

Full-stack Developer

2022

- 
- Developed a Django-based quiz application for assessing Python skills, increasing user engagement through interactive features.
  - Created an admin dashboard for quiz management, improving content control and user management.
  - Introduced a leaderboard feature, enhancing competitive experience among users.
